About the Authors

CHAPTER 1 **The Food on Your Plate** 1

How Nutrition Has Evolved 3

 How Do We Define Nutrition? 3

 Classifying Nutrients 4

 What's Hot: Superfoods 10

Why Do We Make the Food Choices We Do? 11

 Taste 11

 Environment 12

 Culture and Tradition 12

 Culture and Ethnic Foods: What does religion have to do with diets? 13

 Family 13

 Finances 14

 Convenience 14

 The Media 14

 Age 15

 Health Issues 15

How Do the Food Choices We Make Influence Our Health? 16

 Nutrition and Disease: How common is the connection between
 diet and disease? 17

 The Role of Nutrition in the Treatment of Disease 19

 The Role of Government in Nutrition 20

World Nutrition Problems 23

 Undernutrition in the World 25

 Societal Causes of Undernutrition 27

The Science of Nutrition 28

 Whom Are We to Believe About Diet Advice? 29

How Can You Identify Reputable Sources of Nutrition Information?	30
How Nutrition Recommendations Are Developed	31
Chapter Summary	34
Key Terms	34
Chapter Quiz	36

CHAPTER 2 Think Before You Eat: Developing a Nutrition Plan for Health 39

Defining a Healthy Diet	42
Dietary Guidelines	43
Healthy People 2020	45
Recommendations for Specific Nutrients	46
The Dietary Reference Intakes (DRIs)	47
Energy and Macronutrient Requirements	49
MyPlate	51
Solid Fats and Added Sugars	56
MyPyramid Versus MyPlate: Why the change?	57
The Nutrition Facts Label	59
You Decide: Food additives—do we need them and are they safe?	60
Serving Size	62
Calories	63
Nutrients	63
Daily Value	64
Sustainable Nutrition: Cage-free or free-range—what do they really mean?	66
Claims on Labels	67
Putting It All Together	70
Chapter Summary	73
Key Terms	74
References	75
Chapter Quiz	75
Cooking 101: Quick, Easy, Healthy Meal Planning and Preparation	77

CHAPTER 3 Carbohydrates: From Sugar to Fiber and All That's in Between 93

Carbohydrates: A Diverse Class of Nutrients	95
Global Nutrition: Sorghum—the Forgotten Grain	98
How Do We Define a Carbohydrate?	98
Types of Carbohydrates	99
Flavoring and Sweetening Foods	100
Myths and Legends: Is honey healthier for you than table sugar?	101
Complex Carbohydrates	103

What Are the Primary Sources of Carbohydrates?	104
Myths and Legends: Is there a problem with wheat?	107
The Dietary Role of Carbohydrates	109
Dietary Energy	109
Protein Sparing	110
Preventing Ketosis	110
Regulating Blood Glucose Levels	110
Glycemic Response	112
Diabetes Mellitus	114
Forms of Diabetes	115
Health Benefits of Dietary Fiber	118
Resistant Starches	121
Make It a Practice: What's the best way to add fiber to your diet?	122
Can You Consume Too Much Fiber?	123
To Supplement or Not? Is supplemental fiber in pill or powder form the same as fiber found in food?	123
Your Health and Carbohydrates	126
Empty Calories	126
Nutrition and Lifestages: What's so bad about soda in schools?	126
Sugar Intake and Dental Decay	127
Carbohydrate Intake and Obesity	128
Low-Carbohydrate Diets and Weight Loss	128
Myths and Legends: Does eating sugar really cause obesity?	129
Cancer and Heart Disease	130
Lactose Intolerance	130
Chapter Summary	133
Key Terms	133
Reference	134
Chapter Quiz	135

CHAPTER 4 Fats or Lipids: From Plate to Waist 137

The Lipids in Our Food and Our Bodies	139
Fatty Acids	140
What's Hot? Something fishy—omega-3 fatty acids	144
Myths and Legends: Healthwise, which is better—butter or margarine?	148
Triglycerides	148
Phospholipids	149
Sterols/Cholesterol	150
Lipid Functions	151
Storage Form of Energy	151
Supply of Essential Fatty Acids	152
Absorption and Transport of Fat-Soluble Vitamins	152

Organ Insulation and Protection	152
Cell Membrane Structure	153
Precursor to Steroid Hormones	153
Flavor and Satiety of Food	153
Fat Content of Foods	154
Label Definitions	156
Identifying Fats on the Label	157
Trans-Fatty Acids	157
Fat Substitutes	157
Lipids and Health	159
Recommendations for Dietary Intake of Fats	160
Make It a Practice: Choosing the right fats for your diet	162
Obesity	164
Heart Disease	165
What's Hot?: Is Coconut Oil Bad for you or not?	171
Cancer	171
Nutrition and Disease: Who's more susceptible to heart disease, men or women?	172
Nutrition and Culture: Why is the Mediterranean diet so widely recommended?	173
Chapter Summary	177
Key Terms	177
Chapter Quiz	178

CHAPTER 5 Proteins: More Than Just Meat and Muscle 181

Protein Structure, Function, and Turnover	184
Amino Acids	184
Protein Structure	186
Protein Function	189
Food Sources of Protein	195
Protein Quality	195
Nutrition and Disease: Are soybeans a miracle food?	197
Supplemental Protein	198
Recommendations for Protein Intake	199
Myths and Legends: More protein = more muscle—do athletes really need more protein?	200
Vegetarianism	201
Different Types of Vegetarian Diets	201
Why Do People Choose to Become Vegetarians?	203
Health Benefits of a Vegetarian Diet	204
Challenges for Vegetarians	205
What's Hot: Protein for Weight Loss	206

Protein Imbalance	209
Too Little Protein	209
Too Much Protein	211
Chapter Summary	215
Key Terms	216
Chapter Quiz	218
References	220

CHAPTER 6 Digestion, Absorption, and Metabolism: The Link Between Food and Energy 221

The Organs and the Functions of Digestion	224
Myths and Legends: If you swallow chewing gum, will it stay in your stomach for seven years?	225
Absorption	227
The Sum of the Parts	228
Nutrition and Disease: Stomach ulcers	231
What's Hot: Colon cleansing: beware of parasites	236
To Supplement or Not: Probiotics and prebiotics	237
Digestion and Absorption: From Tongue to Blood	239
Carbohydrates	239
Fats	241
Protein	242
Alcohol	242
Vitamins and Minerals	244
Water	245
Myths and Legends: When you mix it up—combining foods	246
Energy and Nutrient Metabolism	249
A Usable Form of Energy	249
Building and Storing	253
Chapter Summary	256
Key Terms	257
References	258
Chapter Quiz	258

CHAPTER 7 Energy Balance and Obesity 261

Calories In Versus Calories Out	264
Calories In: The Food We Eat	264
You Decide: Is the food industry to blame for increasing portion sizes?	266
Make It a Practice: Achieving a healthy weight starts here: portion sizes	267
Calories Out: Energy Expenditure	269

Self-Assessment: Estimating your REE	275
Out of Balance: Overweight, Obesity, and Underweight	276
Body Mass Index (BMI)	277
Body Composition	281
Body Fat Distribution	283
Obesity: An Alarming Trend	284
Nutrition and Lifestages: “The Freshman Fifteen”—fact or fiction?	287
Global Nutrition: Obesity as a global issue	289
Obesity: Choice or Destiny?	290
Causes of Obesity	290
Genetics	292
What’s Hot: Food addiction	293
Weight Management: A Balancing Act	294
Hunger, Appetite, and Satiety	294
Weight Loss: What Doesn’t Work	297
Fasting and Skipping Meals	300
What Does Work	301
You Decide: Is obesity a political issue?	306
Self-Assessment: What do I need to change to be healthier?	310
Seeking Balance	311
Chapter Summary	314
Key Terms	315
Chapter Quiz	316

CHAPTER 8 Water and Electrolytes: Striking a Balance 319

Water and Water Balance	322
Myths and Legends: Is bottled water safer and better for you?	324
Water Balance	325
Sources of Water Loss in the Body	326
Make It a Practice: Staying hydrated during exercise	328
Nutrition and Lifestages: Dehydration in infancy	331
Electrolytes: Sodium, Potassium, and Chloride	334
Dietary Sodium	335
Dietary Chloride	336
Dietary Potassium	336
Make It a Practice: Minimizing salt in your diet	337
Hypertension and Sodium	339
Culture and Ethnic Foods: Salt intake and high blood pressure around the world	340
Absorption and Functions of Electrolytes	344
Absorption	344

Physiological Functions	345
Deficiencies	346
What's Hot: Should you use sports drinks when you exercise?	348
Chapter Summary	350
Key Terms	351
Chapter Quiz	352
References	354

CHAPTER 9 Vitamins 355

Vitamins: A Little Goes a Long Way	358
Origins of the Term "Vitamin"	358
Fat-Soluble Vitamins	360
Vitamin A	360
You Decide: Should I take beta-carotene as a supplement?	364
Vitamin D	365
To Supplement or Not	369
Vitamin E	370
Vitamin K	372
What's Hot? Soda for breakfast?	374
Water-Soluble Vitamins	376
Vitamin C	376
Make It a Practice: How to cook your vegetables	379
B Vitamins	379
Thiamin (B ₁)	381
Riboflavin (B ₂)	382
Niacin (B ₃)	382
Vitamin B ₆	384
Recommended Intakes and Food Sources	384
Nutrition and Lifestyles: Food for thought for all ages	385
Folate (B ₉)	386
Vitamin B ₁₂	389
Nutrition and Disease: The impact of folic acid and vitamin B ₁₂ on blood homocysteine levels and heart disease	390
Biotin (B ₇)	391
Pantothenic Acid (B ₅)	392
Enrichment, Fortification, and Supplementation	393
Enrichment	393
Fortification	394
To Supplement or Not: Vitamin supplements—who needs them?	394
Chapter Summary	399
Key Terms	400
Chapter Quiz	406

CHAPTER 10 Minerals 409

- Mineral Refers to Mining 411
- The Macrominerals 413
 - Calcium 413
 - Nutrition and Disease: Calcium and vitamin D in bone health 414
 - Phosphorus 422
 - Magnesium 424
 - Sulfur 427
- The Microminerals 429
 - Iron 429
 - Zinc 433
 - Nutrition and Lifestages: Zinc in teenage males 435
 - Copper 436
 - You Decide: Can a lack of dietary copper lead to heart disease? 438
 - Selenium 439
 - Fluoride 443
 - Chromium 444
 - Myths and Legends: Can chromium picolinate supplements increase lean tissue in your body? 444
- Chapter Summary 447
- Key Terms 448
- Chapter Quiz 453
- References 454

CHAPTER 11 Supplements 455

- History of Dietary Supplements 458
 - Supplement Regulation 459
 - Make It a Practice: Buyer beware 460
 - Myths and Legends: Ephedra—a matter of life and death for some! 461
 - Partially True Claims 462
 - Nutrition and Lifestages: The fountain of youth in a bottle? 463
- Who Takes Supplements and Why 464
 - Who's Buying Them? 464
 - What's Hot? Energy drinks—do they give you wings or leave you hangin'? 466
 - Why Are They Buying Them? 467
 - Make It a Practice: Always do your homework! 470
- Types of Supplements 472
 - Vitamins and Minerals 472
 - Individual Supplements 473
 - Coenzyme Q₁₀ 475
 - Glucosamine Chondroitin 475

Protein and Amino Acid Supplements	478
Myths and Legends: Weight-loss supplements—trading on the hopes and desperation of an overweight nation	481
Supplements for Performance	483
Caffeine	483
Carnitine	484
Creatine	483
Beta-Hydroxy Beta-Methylbutyrate or HMB	
To Supplement or Not: Will dietary supplements help me or harm me?	486
Herbs and Botanicals	487
Are Natural Supplements More Effective?	487
Chapter Summary	495
Key Terms	496
References	497
Chapter Quiz	498

CHAPTER 12 **Pregnancy, Breastfeeding, and Infant Feeding** 501

Nutrition during Preconception	505
Women	505
Men	505
Stages of Pregnancy	506
First Trimester (Weeks 1–13)	506
Second Trimester (Weeks 14–27)	508
Third Trimester (Week 28 to Birth)	508
Low-Birthweight Newborns	508
Nutritional Needs During Pregnancy	509
Weight Gain	509
Meeting Increased Nutrient Needs	510
Prenatal Vitamin and Mineral Supplements	514
To Supplement or Not: Should pregnant women take herbal and botanical supplements?	515
Hydration	516
Factors That Can Affect Nutritional Intake and Pregnancy Outcome	517
Exercise and Pregnancy	517
Morning Sickness	518
Food Cravings	519
Gastrointestinal Issues	520
Health Conditions	520
Nutrition and Disease: Gestational diabetes	521
Health Precautions During Pregnancy	522

Breast-Feeding	525
Benefits of Breast-Feeding	526
What's Hot? Are breast-fed infants less likely to become overweight?	527
Global Nutrition: Breast-feeding— a cultural thing	529
Recommendations by Government Organizations	530
Breast-Feeding in the First Days Following Birth	531
Breast-Feeding After Six Months	531
Nutritional Needs of the Breast-Feeding Mother	532
Foods to Avoid	533
Barriers to Breastfeeding	534
What Are the Alternatives to Breast-Feeding?	534
The Nutritional Needs of Infants Beyond Milk	537
Hydration	537
Vitamins and Minerals	540
Starting Solid Foods	541
The Importance of Nutrient-Dense Foods	543
Vegetarianism: Are vegan and vegetarian diets safe for infants?	544
Sequencing Solid Foods	545
Bottle-Mouth Syndrome	547
Chapter Summary	550
Key Terms	551
References	551
Chapter Quiz	552

CHAPTER 13 Nutrition for Children, Adolescents, and Older Adults 555

Nutrition During Childhood	558
Rapid Development Change in Childhood	558
The Nutritional Needs and Eating Habits of Children	558
What Children Like to Eat and Why	561
Snacking	563
Health Concerns of Childhood	564
What's Hot: Fast food—excess calories for children	568
Food and Behavior in Children	571
Nutrition and Lifestages: Does breakfast for children improve brain function?	572
Nutrition During the Adolescent Years	573
Rapid Growth	574
Puberty	574
Nutrient Needs of Adolescents	574
To Supplement or Not: Should teenage girls take a calcium supplement?	576

Food Habits of Adolescents	577
What Are Some of the Major Health Concerns of Adolescents?	578
Nutrition and Disease: Are Adolescents at Risk for Diabetes?	580
Myths and Legends: Do certain foods cause or contribute to acne?	582
Nutrition for Older Adults	583
Social and Psychological Aspects of Aging	584
Make It a Practice: Community food programs	586
Physical and Physiological Factors	587
Nutrition and Disease: Is aging really a disease?	591
Nutrient Requirements of Older Adults	592
Factors Affecting Nutrient Use	593
Major Nutrition-Related Issues and Older Adults	593
The Most Common Issues	593
Make it a practice: A diet for successful aging	599
You Decide: Should older adults use vitamin and mineral supplements?	600
Chapter Summary	602
Key Terms	603
References	603
Chapter Quiz	604

CHAPTER 14 Sport and Exercise Nutrition 607

Exercise Basics	611
The Benefits of Exercise	611
Self-Assessment: How do you choose the right exercise?	612
The Role of Exercise in Weight Management and Strength Training	614
Nutrition and Lifestyles: It's never too late—exercise and sports nutrition for the older adult	614
Recommendations: How Much Exercise Is Enough?	615
Myths and Legends: What not to believe!	616
Strength Training	617
Fueling Exercise	619
The Immediate Energy System	620
Glycolysis	620
Continual Use of Energy Pathways	622
Fuel for Exercise	623
Calorie Needs	623
Make It a Practice: Gaining muscle mass the healthy way	624
Carbohydrates as a Fuel	626
The Importance of Maintaining Carbohydrate Reserves	627
Fat as a Fuel	628

Protein as a Fuel	629
Vegetarianism: Does being a vegetarian impair performance?	630
Vitamin and Mineral Needs for Exercise	631
Ergogenic Aids	631
Pre-Exercise Meals	632
Make It a Practice: Carbohydrate loading	633
Nutrition during Exercise	636
Make It a Practice: Eating and drinking when you're literally "on the run"	637
Post-Exercise Recovery	638
What's Hot?: Energy bars—do you really need them?	639
Maintaining Fluid Balance during Exercise	641
Drink Early, Drink Often	642
Adjustments in Cold Weather	642
Monitoring Hydration Status	642
Electrolytes	643
Wrapping It All Up	644
Chapter Summary	648
Key Terms	649
Chapter Quiz	650

CHAPTER 15 Eating Disorders: Do Not Discriminate 653

How Do We Define Eating Disorders?	656
Anorexia Nervosa	658
Bulimia Nervosa	658
Binge Eating Disorder	659
Nutrition and Culture: Men and eating disorders	659
Other Specified Feeding or Eating Disorders (OSFED)	661
Eating Disorders Affect People of All Ages and Ethnicities	661
Make It a Practice: Does someone you care about potentially have an eating disorder	663
Risk Factors	666
Dieting	666
Cultural Pressure	668
Body Dissatisfaction	669
To Supplement or Not: Anabolic steroids— a vicious cycle	670
Teasing	672
Self-Esteem	673
Self-Assessment: How do you feel about your own body?	674
Puberty	674
Family	675
Athletes	676

Medical Complications, Treatment, and Prevention of Eating Disorders	678
Medical Complications	678
Treatment	680
Chapter Summary	685
Key Terms	686
References	687
Chapter Quiz	688

CHAPTER 16 Alcohol and Your Health 691

Alcohol Production	694
How Alcoholic Beverages Are Made	694
Proof and Percentage of Alcohol	695
Alcohol Consumption and Its Influence on Blood Alcohol Concentration (BAC)	696
Myths and Legends: Will drinking coffee make you sober?	699
Levels of Consumption	699
To Supplement or Not: Will supplements prevent or cure a hangover?	700
Digestion and Metabolism	701
Alcohol, Absorption, and the Liver	701
Nutrition and Disease: Alcohol and liver disease	702
Alcohol and the Brain	703
What's Hot: Binge drinking on college campuses	704
Health and Alcohol Consumption	705
Health Risks	706
Nutrition and Lifestages: Alcohol and pregnancy	707
You Decide: Alcohol intake and advertisement in youth: Should alcohol advertisement be banned?	708
Self-Assessment: Do you have a problem with alcohol?	711
Health Benefits	713
Nutrition and Culture: Alcohol intake in the United States	717
Chapter Summary	719
Key Terms	719
References	720
Chapter Quiz	720

CHAPTER 17 Assuring a Safe Food Supply 723

Myths and Legends: The “five-second rule”	726
The Food Supply Chain	727
What's Hot: The “American food supply”: a return to a local approach	727
Causes of Food-Borne Illness	728

Food-Borne Illnesses Remain a Significant Public Health Problem	734
Food Processing and Safety: From Farm to Table	738
The Hazard Analysis Critical Control Point System	738
Food Safety at the Farm	738
Sustainability of the Food Supply	739
Contaminants in the Fish Supply	740
What's Hot: Are organic foods better for you?	740
Food Safety and Common Food-Processing Techniques	741
Myths and Legends: Is raw milk better for children?	743
You Decide: Is the use of hormones and antibiotics in the production of meat and dairy products harmful?	746
What's Hot: Genetically engineered foods—are they a change for the better?	749
Consumers: The Last Line of Defense	750
Food Safety Practices You Can Use	750
Tips for Grocery Shopping	753
Storing Food	756
Preparing Food	758
Putting It All Together	762
Chapter Summary	764
Key Terms	764
Chapter Quiz	766

INDEX
