

FROM OVER 30 YEARS OF EXPERIENCE:

There is absolutely nothing like this book. There is absolutely no training in physics that comes anywhere close to this training. There is absolutely no more powerful way to achieve academic equity in STEM than to offer a preparation for physics class, using this book/training, for both life and physical science majors.

I challenge you to take a close look and then test drive it with students. It's time to change the game.

It's time for equity in STEM. It's time that physics is no longer a barrier for the have-nots, meaning those without a solid AP physics course. It's time we elevate the level of students entering upper division so that more can be learned and ultimately achieved. It's time for physics teachers to stop trying to do the impossible—teach physics at an appropriate level in the allotted time to unprepared students.

I challenge you to fully explore what this can do for your students. I challenge you to bring equity to STEM.

(Full Canvas course and syllabus available upon request.)

Your Physics Coach by Jon Anthony Celesia/Kendall Hunt

Nothing comes close.
