Contents

Preface **v**

Prologue **1**

Why Should I Read A Math Book? 6

Chapter 1 **7**

Why Are Definitions Important? 10

Sets **11**

Exercises 20

Chapter 2 **21**

Set Properties **23**

Exercises 30

Chapter 3 **31**

Logic **33**

Exercises 42

Chapter 4 **43**

Why Should I Memorize? 46

Elementary Number Theory **47**

Exercises 57

Chapter 5 **59**

Proof **63**

Exercises 74

Chapter 6 **75**

Mathematical Induction **79**

Exercises 88

Chapter 7 **89**

Counting—Part 1 **93**

Exercises 108

Chapter 8 **111**

Counting—Part 2 **115**

Exercises 128

Quiz Yourself 130

Chapter 9 **131**

Algorithms **135**

Exercises 144

Chapter 10 **145**

Recursion **149**

Exercises 159

Characteristic Equations Having Repeated Roots . . . 160

Chapter 11 **161**

Thinking About Group Projects 164

Finite-State Machines; Regular Expressions **165**

Exercises 173

Chapter 12 **175**

Graphs **179**

Exercises 189

Chapter 13 **191**

Trees **195**

Exercises 205

Chapter 14 **207**

Functions and Relations **211**

Exercises 221

Chapter 15 **223**

Appendices **229**

Appendix 1: Log Function Review 229

Appendix 2: Summation Notation Review 230

References and Credits **231**

Index **237**
