
Table of Contents

1 The Importance of Plants to Humans	1
Roles of Plants	1
2 Plant Parts.....	5
Roots.....	6
Parts of the Root System.....	6
Leaves	6
Stems	8
Flowers	8
Fruit.....	10
3 Functions of Plant Parts.....	13
Roots: Primary Functions.....	13
Plant Leaf Processes	14
Stem Functions	14
Fruit and Seed Production	15
Importance of Flower Reproduction	15
4 Anatomy of Plants.....	19
Plant Cell.....	20
Cell Structures.....	20
Tissues.....	23
Anatomy of Primary Organs.....	27
Primary and Secondary Growth.....	30
5 Importance of Soil.....	31
Importance of Soil	31
Soil and Plant Culture.....	32
Soil - Medium for Plant Growth.....	32

6	Soil Texture and Structure.....	37
	Composition of Soil.....	37
	Organic Matter.....	38
	Soil Profile.....	39
	How the Nature of Parent Material Affects the Soil.....	40
	Physical Properties of Soil.....	41
7	Influence of Texture on Soil.....	45
	Soil Separates.....	45
	Soil Classification According to Texture.....	47
	Soil Profile.....	48
	Components of a Soil Profile.....	48
	Characteristics of the Four Horizons.....	49
	Soil Profile Color Significance.....	50
	Importance of Soil Profile in Determining Crop Production.....	50
	Soil Testing.....	50
	Collecting Soil Samples.....	51
8	Soil Erosion and Conservation.....	53
	Soil Erosion.....	53
	Types of Soil Erosion.....	53
	Cultural Practices Contributing to Soil Erosion.....	55
	Results of Erosion.....	56
	Soil Conservation Practices for the Control of Soil Erosion.....	56
9	Introduction to Irrigation.....	59
	History of Irrigation.....	59
	Irrigation Systems.....	60
	Ditch Maintenance.....	63
	Scientific Irrigation Scheduling.....	63
	Irrigation System Advantages and Disadvantages.....	64
10	Irrigation Terminology.....	67
	Water – H ₂ O.....	67
	Irrigation Terminology.....	68

11	Selecting an Irrigation Practice.....	71
	Irrigation Reduces Risk.....	71
	Selecting Land for Irrigation	71
	Obtaining Water	72
	Water Quality	72
	Drainage.....	73
12	Knowing When to Irrigate	75
	Knowing When to Irrigate	75
	Methods Used to Determine Soil Moisture	78
	Other Methods for Determining When to Irrigate.....	80
	Crop Water Requirements.....	81
13	Water Measurement and Soil Capacity	83
	Water Measurements and Soil Capacity	83
14	Transpiration	89
	Transpiration	89
	Environmental Factors Affecting Transpiration.....	91
15	Translocation	93
	Translocation.....	93
	Other Functions of Translocation	95
16	Nutrients Essential to Plant Growth	97
	Introduction	97
	Sixteen Essential Elements	97
	Functions of Plant Elements and Their Deficiencies	99
	Micronutrients	101
17	Primary Plant Nutrients	105
	Sources of Primary Plant Nutrients (N, P, K)	105
18	Signs of Nutrient Deficiencies	109
	A Key to Nutrient Deficiency Signs	109
19	Plant Growth Requirements.....	115
	Plant Growth Requirements.....	115

20 Fertilizer Labels and Calculations.....	123
Fertilizer Labels.....	123
Nutrient Content of Commercial Fertilizers.....	124
Fertilizer Calculations.....	125
Calculating the Best Buy.....	126
Recommended Nutrient Amounts.....	127
Fertilizing Crops for Production	128
Determining Fertilizer Need.....	128
Determining Crop Production Goal.....	129
Determining Yield Goal.....	130
Soil Reserve	130
Crop Residue.....	130
Common Commercial Fertilizers (N, P, K)	131
How Much (N) to Feed Plants	131
21 Fertilizer Applications.....	135
Methods of Fertilizer Application	135
Pre-plant Applications: Broadcast or Injection	136
At-Planting Applications	137
Post-Emergence Applications: Side or Top Dressing.....	138
Water-Run Applications: Open or Closed Systems.....	139
Foliar Applications	139
Fertilizer-Pesticide Mixtures	140
Example Calibration of Fertilizer Spreaders	140
22 Photosynthesis.....	143
Importance of Photosynthesis	143
The Photosynthetic Process.....	146
23 Respiration.....	151
Respiration Process	151
Factors Affecting Respiration.....	155
Importance of Respiration to Agriculture.....	155

24 Mitosis.....	159
Mitosis.....	159
Six Steps of Mitosis.....	160
25 Vegetative Growth	163
Annuals	163
Biennials.....	164
Perennials	164
26 Plant Propagation by Seed	167
Plant Propagation by Seed.....	167
Seeds.....	168
More about Seeds.....	169
27 Starting Plants from Seed.....	173
Propagation from Seed	173
Seedbed Preparation and Planting.....	174
Planting in Flats	175
Factors Causing Poor Seed Germination	176
Transplanting	178
Care of Young Plants	178
28 Plant Propagation by Vegetative Means	181
Vegetative Reproduction.....	181
Eight Common Types of Vegetative Methods	182
29 Introduction to Plant Pests	185
Introduction to Plants Pests	185
Weeds	186
Invertebrates.....	186
Vertebrates	187
Disease Agents	188
Challenges of Pests	188
30 Damage Caused by Plant Diseases	191
Damage Caused by Plant Diseases	191
Disease-Causing Organisms	192

31 Cultural Methods of Plant Disease Control	197
Cultural Methods of Plant Disease Control	197
Disease Control.....	198
32 Chemical Methods of Disease Control.....	201
Disease Control Chemicals	201
Foliage Sprays and Dusts	202
Seed Treatment	203
Controlling Postharvest Diseases	203
Soil Treatment	204
Disinfestation of Warehouses.....	204
Controlling Insect Vectors.....	204
Resistance and Hazards	204
Treating Tree Wounds.....	205
33 Biology of Insects	207
Biology of Insects.....	207
Insect Body	208
Life Cycle	209
34 Insect Control	213
Damage Caused by Insects	213
Insect Control	214
35 Pesticide Safety: High Toxicity	217
Pesticide Safety - High Toxicity	217
Personal Protective Equipment (PPE)	218
36 Pesticide Safety: Low Toxicity	221
Pesticide Label Information and Low Toxicity Pesticides.....	221
General Rules	223
First Aid	224
37 Insect Collections	227
Insect Collecting.....	227
Identifying Insects	229

38 Weed Identification	231
Weeds	231
Some Common Weeds and Their Scientific Names	233
Weed Collections	233
Life Cycles of Weeds	234
Identification	234
39 Weed Control	241
Importance of Weed Control	241
Weed Control	241
Methods of Controlling Weeds with Herbicides	243
40 Workplace Safety	245
Workplace Safety	245
Common Accidents and Identifying Prevention Procedures	246
Safety	247
41 Genetic Engineering and Biotechnology	251
What is Biotechnology?	251
Genetic Engineering of Plants	252
Purposes of Biotechnology	252
Examples of Biotechnology on Production Agriculture	253
Tissue Culture, a Biotechnology – Advantages and Disadvantages	254
How Tissue Culture Works	255
Steps in Tissue Culture	256
New Words from Biotechnology	257
Public Awareness	257
42 Precision Agriculture and Robotics	259
Introduction	260
Overview of How It Works	260
Hardware, Software and Practices	261
GPS and GNSS	261
GIS Equipment	262
Remote Sensing	262
Precision Agricultural Strategies Used by Farmers	263

Agricultural Drones	263
Federal Aviation Administration (FAA)	264
Robotics in Agriculture.....	265
43 Fiber Crops.....	269
Fiber Crops	269
Cotton	270
Cotton Description and Growth.....	270
Adaptation and Distribution.....	271
Management.....	271
Planting.....	271
Pest Management.....	272
Weed Management.....	272
Protection from Insects and Fungal Diseases	272
Fertilization	273
Tissue Analysis.....	273
Irrigation.....	273
Harvesting	273
Grading and Processing Cotton	274
Other Fiber Crops	275
44 Cereal Grains.....	277
Five Criteria for Selecting a Grain Crop	277
Cultural Practices for Major Grain Crops.....	278
45 Forage Crops.....	281
Forage Crops	281
46 Oilseeds.....	285
Oil Crops.....	285
Soybeans - Most Important Oil Crop in the United States	286
47 Sugar Crops	291
Sugar Crops	291
Growing and Harvesting Sugar Cane	292
Extracting Sugar from Cane.....	293
By-products of Sugar Cane.....	293

Growing and Harvesting Sugar Beets	294
Extracting Sugar from Beets	294
Byproducts of Sugar beets	295
48 Vegetable Crops	297
Economic Importance of Vegetables to U.S. Agriculture.....	298
Importance of Vegetables in Human Nutrition.....	299
Environment Effects Growth	300
Important Techniques in Producing a Vegetable Crop	301
Pests Negatively Affect Growth and Production	301
Biotechnological Advances Can Aid in Increasing Vegetable Production	301
Marketing of Commercially Grown Vegetables	301
49 Specialty Crops.....	303
Specialty Crops.....	303
USDA Involvement	309
Production Practices to Successfully Grow These Crops	309
Soil Tillage Requirements.....	310
Crop Fertilization	310
Pest Management.....	312
Disease Control.....	312
Specialty Crops Harvested to Maximize Quality	312
Post-Harvest Treatments	313
50 Fruits	315
Cultural Practices for Fruit Crops	315
Harvest or Post-Harvest Methods for Fruit Crops.....	316
51 Nut Production	319
U.S. Nut Production	319
Selecting Nut Trees.....	320
Some Nut Varieties	320
Cultural Practices for Nut Crops	321
Disease and Pest Control.....	321
Harvest or Post-Harvest Methods for Nut Crops.....	321

52 Flowers and Foliage	323
Value of Floriculture.....	323
Flowering Herbaceous Perennials (common and <i>scientific</i> names).....	324
Growing Perennials	324
Flowering Annuals (common and <i>scientific</i> name).....	325
Annual Bulbs.....	336
Flowering Houseplants	330
53 Sod Production.....	333
Value of Turf.....	333
Functions of Turf	334
Turfgrass Maintenance Practices.....	334
Turfgrasses (common and scientific names).....	334
Sod Production Practices	335
Marketing and Selling Sod	338
54 Organic Production Practices.....	341
Organic Farming.....	342
International Organic Standards	343
Claims of Organic Production	343
Crop Nutrition	344
Manure	344
Best Management Practices.....	348
Composting	348
Characteristics of Well-prepared Compost.....	350
Green Manures.....	350
Cover Crops.....	350
Choice of Crops	351
Crop Rotations	351
Weed Control	352
Pest and Disease Control.....	352
Genetic Diversity	353
Use of Water	354

Animals and Organic Growing.....	354
Sustainable Agriculture.....	354
55 Hydroponics/Aquaponics.....	357
Hydroponics.....	357
Plant Growth Requirements.....	359
Common Vegetable Crops Suitable for Hydroponics or Aquaponics	360
Glossary.....	361
Appendix.....	379
National Agriculture, Food and Natural Resources (AFNR) Career Cluster Content Standards (<i>Revised 2015</i>).....	379
